Everything Else in AWS

We lead our customers through their digital transformation with such an impact - they can't imagine going back to the old way. As an AWS Advanced Technology Partner, we have the proven experience and global coverage to work with the largest companies in all major languages.

Customers choose us because our AWS partner status means less risk for customers. Our AWS partner status is one of the highest partner levels, so you are safe in choosing Cloud Titans for your next project. Our status demonstrates that we have IP and a proprietary project management process that delivers for customers. We also have the best pricing and offer more value by providing continuous security/cost reviews, and advisory services at no additional cost.

Lastly, when it comes to social responsibility, we have one of the most diverse executive teams, compensate all employees equitably, are a registered WMBE, and are the only carbon-neutral AWS Advanced Technology Partner.

Benefits of Buying AWS from Cloud Titans

For years, AWS has consistently recommended my company to sell and deploy the software it licenses to corporations large and small.

Today, we have more than 100 employees and affiliates servicing hundreds of clients in dozens of industries. From cloud, on-premise, support, or licensing, Cloud Titans consistently delivers for clients worldwide.

As most of our architects, engineers, developers are former AWS, we have relationships with AWS product groups and executives that give us access to code and knowledge not generally available to our competitors. Coupled with our experience and proven process driven approach, we are the best when it comes to AWS.

Cloud Titans is an award-winning "AWS Advanced Certified Partner" focused on the deployment of AWS technologies for U.S. and international companies. Key distinctions differentiating CT from competitors include:

Former AWS Engineers

Cloud Titans hires former AWS engineers and consultants with extensive project and vertical experience. CT carefully categorizes its various levels of consulting professionals (i.e. Architectural Consultant, Principal Consultant, Senior Consultant, etc.) based on mandatory levels of industry, product, and project experience.

Access to AWS

In addition to the personal relationships we maintain with AWS, CT's executives maintain an exclusive level of access to AWS Product Group developers, as well as AWS's upper management and funding programs.

Multiple AWS Competencies

CT possesses several solutions competencies, which are official AWS endorsements and are only achieved through AWS based on client references, project experience, and product certifications.

Award-Winning AWS Partner Status

Cloud Titans enjoys privileged access to exclusive AWS resources, such as the ability to open AWS support cases (at no cost to the client) and access to AWS funding programs to help fund clients' projects.

Focus on Client's Goals

Cloud Titans is privately owned and operated in the USA with no outside or foreign investors allowing us to put clients and customer service ahead of profits.
